Developed a web platform using React.js and Express.js for users to review and discuss Formula 1 races.

Bookvault

Developed a Kotlin application for managing book collections.

CruzARG

Developed a video game using C++ and SFML, focusing on game mechanics.

ABOUT ME

I started my journey as a Front-End Developer with a strong focus on design and user experience. Over the course of my career, I expanded my knowledge to web technologies, mobile development, and video games. I aim to secure a full-time position where I can apply my skills, continue learning, and collaborate on innovative projects.
